

Hot water?
Turn it aside, and
shower quick!

Right now Catalunya is facing an extreme drought...

But YOU can help!

At GotaHub, we foster a symbiosis between tourism and local community by helping deliver water otherwise-wasted to urban gardens.

G*TA HUB

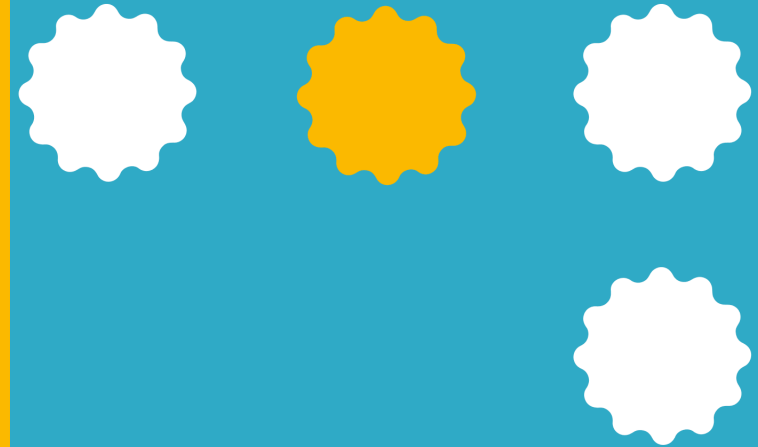

G*TA HUB

We foster a symbiosis between tourism and local communities by delivering wasted water to urban gardens.

Catch the cold water, don't let it go to waste!

Right now Catalunya is facing an extreme drought, and tourism exerts significant pressure on freshwater resources.

We take care of the water and give it a new purpose for the local community gardens here in Barcelona.
